8. TEACHING

(a) *Areas of special interest and accomplishments*

PhD student supervision: Since 2013, I had and have been advising 17 PhD students as their main supervisor or as a member of their PhD dissertation committee as follows. 5 PhD students finished their PhD degrees and 1 PhD student is writing their PhD dissertation under my supervision. In addition, I had and have been actively advising 11 PhD students as a member of their PhD dissertation committee.

Undergraduate student supervision: I am actively hiring undergraduate students as my research assistant to gain research experience and to develop their potential for a research career. **Three undergraduate students and I have received the following awards: NSERC Undergraduate Student Research Awards 2016-2017, Work Learn Winter 2016, Work Learn Winter 2017, and Arts Work Learn International Award 2018.** These students have been successful in starting their academic career. One student (Chiyong Ahn) is now pursuing his master degree at UBC after working one year at the Bank of Canada as a research assistant. Another student (Jasmine Yang) is now in the master program at the London School of Economics.

Teaching: One of the challenges in teaching in classes is to keep strong students interested while not leaving weak ones behind. In my opinion, the best way to do so is to create a class environment where every student feels free asking a question in class. I tell students that every question he or she raises is an important question and beg them to ask questions in class. Since I get many questions from different students in class, depending on the type of questions, I may clarify the basic material covered in class or I may challenge strong students with even more advanced materials and help them to think the strengths and the weaknesses of the theories and models covered in the class. I also see a question from students as an opportunity to learn how to improve my teaching skills since a question often reveals where students are confused and where my teaching is not effective. To promote active learning as well as better communication with students, I use iclicker in my undergraduate teaching.

9. SCHOLARLY AND PROFESSIONAL ACTIVITIES

(a) Areas of special interest and accomplishments

In 2017, I received **Nakahara Prize**, which is an annual award given by the Japanese Economics Association to Japanese economists under the age of 45 whose work has gained international recognition.

Since July of 2017, I am serving as a co-editor of the **Canadian Journal of Economics**, which is an internationally recognized peer-reviewed academic journal of economics published by Wiley-Blackwell on behalf of the Canadian Economics Association.

In 2010, I received the **2010 Arnold Zellner Award** for the most significant theoretical paper published in the Journal of Econometrics in 2008 and 2009, where the Journal of Econometrics is viewed as a top field journal in econometrics.

Between 2015 and 2020, I received the following grants as Principal Investigator: 1 SSHRC Insight Grants and 2 SSHRC Insight Development Grants as well as 2 NSERC Discovery Grants.
