Work in progress

“Trade with whom you Know: Firm-to-Firm Trade and Social Networks”, with Jaedo Choi

We merge data on firm-to-firm trade with biographical data of senior executive. We find that two firms are more likely to trade if two of their senior managers have worked together in the past.

“Checkpoints and Local Economic Development”, with Veda Narasimhan

We use the removal of state-to-state trade barriers in India following the nationwide GST reform as a natural experiment to study the local impact of border checkpoints. We find evidence of higher nightlight in villages close to the checkpoints before the reform.
